The Beekenkamp Ornamentals Team is proud to present the new 2026/2027 Catalogue, bringing together exciting new varieties alongside the strong, reliable favourites you know and trust. Our bedding breeding continues to move forward with purpose. This season, the Petunia Tea™ range expands with distinctive new fancy colours that add real value to your customer. The introduction of the Calibrachoa Oasis series offers versatility and impact, ideal for 10+ cm pots and perfectly suited for combination containers, for example when paired with Dahlia LaBella®. A true standout is Oasis Rosy Maple, featuring soft pastel pink tones with subtle hints of yellow and white that develops into a harmonious, almost pre-mixed presentation with

layered colour interest in a single plant. We also continue to strengthen our seed-raised young plant assortment to give you dependable choices that meet both market demand and your production efficiency. As always, this catalogue provides clear guidelines on pot sizes and growing times, with delivery weeks specified per product. For the most up-to-date order form, please visit the Beekenkamp Ornamentals website under “Orders”. The Beekenkamp Ornamentals team thanks you for your continued trust and remains committed to supporting you in the coming season, together growing for the future.

BEEKENKAMP
· SINCE 1951 ·

BEEKENKAMP GROUP CELEBRATES 75TH ANNIVERSARY

Beekenkamp Group celebrates its 75th anniversary this year. What began in 1951 as a small-scale vegetable plant nursery on 1.3 hectares in Maasdijk has grown into an international enterprise with more than 95 hectares of greenhouses, over 2,900 employees and an annual production of more than 2 billion young plants, divided among Beekenkamp Vegetables, Beekenkamp Ornamentals, Beekenkamp Verpakkingen and Deliflor Chrysanten. The family story of Beekenkamp Group began in 1951 with founder Govert Beekenkamp. His vision and entrepreneurship laid the foundation for a versatile and innovative company within global horticulture. Commitment, reliability and innovation have been central from the very beginning and remain the core values of the family business. Resilience and a determined mentality form the basis of what the company is today: a leading international player with activities in more than 45 countries and branches in Europe, Africa, North and South America, and Asia.

An Beekenkamp, co-owner: “This anniversary is a tribute to our employees and to our loyal customers. Our people are the heart of the company; their craftsmanship and commitment have brought us to where we are today. Equally important are the customers who have placed their trust in us for many years and with whom we continue to grow and innovate. We celebrate 75 years of history, but above all the people and relationships that make us stronger every day.”

From the 1980s onwards, the company began a strong growth acceleration with the acquisition of Lyraflor, the establishment of Beekenkamp Verpakkingen, and the expansion of cutting production to countries including Uganda, Ethiopia and Kenya. Thanks to several strategic acquisitions – including Leen de Mos Tropica, Fred Blokker, Novaplant, Deltastek, Brabantstek and Florema – Beekenkamp further developed into a major market

player in young plants. In 2000, Govert handed the company over to his daughters An and Margriet. Under the leadership of An Beekenkamp, Marc Driessen, Peter Zaat and Fons van der Vleuten, major steps have once again been taken in recent years. The opening of the Research & Development Center in Maasdijk, new production locations in Kenya, Colombia and Japan, a state-of-the-art rooting facility in Nieuwaal and the newly built vegetable greenhouse in Maasdijk all demonstrate the organisation's ongoing commitment to global innovation.

Beekenkamp Group proudly reflects on 75 years of entrepreneurship and confidently looks ahead to the future, with the mission to deliver young plants from the best genetics and sustainable solutions for the global horticultural sector.

At Beekenkamp, corporate social responsibility is part of our everyday work. We care about the wellbeing of our employees worldwide and continuously reduce the environmental impact of our operations. High standards for working conditions, sustainability and hygiene are firmly in place, externally monitored and backed by multiple certifications.

Innovation and sustainability go hand in hand. Our Product Management, Breeding and Marketing teams work closely together to test genetics worldwide and deliver strong, high-quality plants suited to different climate zones. Our research focuses on improving quality, reducing the use of growth regulators and extending shelf and garden life. We breed for disease resistance and develop varieties that require fewer resources, such as water-efficient Celosia and Pericallis POP suited to lower temperatures. These traits are tested at our Research and Development Center in Maasdijk, the Netherlands.

Through strong, market-ready concepts, our Marketing team brings genetics to life. These clear and original plant concepts create value for growers, retailers and consumers, helping our partners stand out from breeding to point of sale.

Energy plays a crucial role in greenhouse horticulture, which is why we are actively transitioning away from natural gas and investing in locally generated, sustainable energy. Through our participation in the Aardwarmtecluster Maasdijk geothermal project, our Maasdijk locations can efficiently exchange heat.

Together, these efforts help us build a future-ready horticultural sector. We value long-term partnerships and warmly invite you to visit our trial gardens, facilities and the Beekenkamp Inspiration Center, onsite or online.
